

Network-wide PST file management can be a nightmare

Centrally archive all company email and end PST hell today!

GFIMailArchiver

Email archiving solutions for internal and external email

GFI MailArchiver for Exchange provides easy-to-use corporate email archiving, enabling you to centrally archive all internal and external email. GFI MailArchiver allows you to archive emails into one or multiple databases, providing both the network administrator and employees with a number of benefits:

- GFI MailArchiver allows employees to use Microsoft Outlook email client or Internet Explorer to locate emails from anywhere in the world.
- Quickly restore emails back to a mailbox through OneClick Restore.
- Network administrators can now avoid the pains of PST file management by importing PST files to an SQL archive.
- Has an inbuilt SQL database or use Microsoft SQL Server to store a complete copy of your organisations email. Utilises single instance storage and attachment compression to reduce SQL database size.
- Increases Exchange performance by reducing the amount of email stored on the Exchange Server.
- Active Directory Group Based Security to ensure that users can only view email they are authorised for.
